## Introduction

### What Is Prostate Cancer?

Cancer is a condition where cells in the body multiply uncontrollably. If this uncontrollable growth begins in the prostate gland, it is known as prostate cancer. Among American men, prostate cancer is the most common form of Cancer after skin cancer. Early detection of prostate cancer, while it is still limited to the prostate gland, significantly increases the chances of successful treatment. is still localized to the prostate gland, substantially increasing the likelihood of effective treatment.

[What Is Prostate Cancer? | CDC](#)

Prostate cancer awareness has been prominent for over three decades, with early detection tests like Prostate-specific antigen (PSA) tests introduced in the late 1980s. Here is a compilation of numerous celebrities and public figures, including athletes, actors, politicians, financiers, and other notable individuals, who have been in the spotlight over the past few decades.

We have all heard of many (or most) of those on that list. Despite all the media attention given to these celebrities, most men still need to choose to get their PSA tested.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## DeFeat Cancer® – ACCCOLPH Incorporated

### Introduction

#### Familiar Names of Prostate Cancer

Prostate cancer awareness has been prominent for over three decades, with early detection tests like Prostate-specific antigen (PSA) tests introduced in the late 1980s. Here is a compilation of numerous celebrities and public figures, including athletes, actors, politicians, financiers, and other notable individuals, who have been in the spotlight over the past few decades.

Andrew Lloyd Webber	Andy Grove	Andy Taylor	Arnold Palmer	Ben Stiller
Bill Bixby	Bob Casey	Bob Dole	Brooks Robinson	Cal Ripken
Carlton Fisk	Charlie Wilson	Charlton Heston	Colin Powell	Dan Fogelberg
Darwin Deason	Davey Lopes	David Koch	Dennis Hopper	Desmond Tutu
Dexter Scott King	Don Ameche	Don Imus	Drew Pinsky(Dr.Drew)	Dusty Baker
Earl Woods	Eldridge Cleaver	Elton John	Floyd Patterson	Francis Collins (Dr.)
Francois Mitterrand	Frank Zappa	Gary Cooper	Glenn Thompson	Gregg Olson
Harry Belafonte	Herbie Mann	Ian McKellen	James Herriot	Jerry Brown
Jerry Lewis	Jerry Orbach	Joe Madison	Joe Torre	John Kerry
Johnny Ramone	Ken Griffey Sr.	Langston Hughes	Linus Pauling	Lloyd Austin
Louis Gossett Jr	Mandy Patinkin	Merv Griffin	Michael Bennet	Michael Milken
Mitt Romney	Nelson Mandela	O.J. Simpson	Phil Lesh	Phil Niekro
Ryne Sandberg	Rob Gardenhire	Rob Halford	Robert DeNiro	Rod Stewart
Roger Moore	Ron Wyden	Rudy Giuliani	Ryan O'Neal	Shannon Sharpe
Sidney Poitier	Stephen Fry	Steve Garvey	Stokely Carmichael	Telly Savalas
Thom Tillis	Tim Commerford	Timothy Leary	Tony Fontane	Ty Cobb
Warren Buffet				

We have all heard of many (or most) of those on that list. Despite all the media attention given to these celebrities, most men still need to choose to get their PSA tested.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## Prostate Cancer: The Silent Killer Lurking in the Shadows

Prostate cancer is commonly known as the "silent killer" because it usually doesn't cause noticeable symptoms in its early stages. This makes it challenging to detect and diagnose the Cancer until it has progressed to a more severe stage, which can be dangerous. Regular screenings and check-ups can help to identify prostate cancer early when treatment is most effective.

The tree metaphor illustrates prostate cancer well. It feeds, strengthens, stabilizes, and grows the tree while buried underground. Like tree branches and leaves, we often focus on observable outcomes and talents.

However, health matters most. Even though we appear healthy and prosperous, any underlying flaws or disorders in our 'roots' can eventually deteriorate our well-being, leading to severe health conditions or a decline in overall quality of life.

For longevity, we must prioritize our inner health and build a strong foundation, like a tree. This involves caring for our bodily and emotional health and getting regular checkups and screenings. These are crucial for early detection and prevention of potential health issues. By doing so, we can live a healthier and happier life, just like a tree with healthy roots that thrive and blossom.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## Jacksonville Military Community

*Prostate cancer incidence rates in the military are nearly twice those of the general population.*

Jacksonville, Florida, is known for its strong military presence, with multiple military bases and installations in the area. The city is home to Naval Air Station Jacksonville and Naval Station Mayport, among others. The military community plays a significant role in shaping Jacksonville's culture and economy. It's a diverse and vibrant city with a rich history of supporting service members and their families.

*One in five military personnel are expected to be diagnosed with prostate cancer*

### **Department of Veterans Affairs (DVA)**

Prostate cancer is the most frequently diagnosed cancer among U.S. veterans, with 41% of diagnoses at the Department of Veterans Affairs (DVA). Around one in every five veterans will develop the disease, amounting to approximately 15,000 new diagnoses annually.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## Jacksonville Military Community

Jacksonville's metro area, located in Florida, is home to a higher concentration of military veterans than the average across the country. An estimated 142,111 civilians, or 12.1% of the local adult population, have a military service background.

Northeast Florida's strong military presence has a significant economic impact on the region, providing stability and diversity within the local community. Area military installations such as Naval Air Station Jacksonville, Naval Station Mayport, Kings Bay Naval Base, Camp Blanding Joint Training Center, Naval Aviation Depot Jacksonville, and Marine Corps Blount Island Command employ thousands of active duty, reserve, and civilian men and women.

*Prostate Cancer is the most common cancer diagnosis for Veterans.*

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## African American Community

### *1-in-5 Black men will be diagnosed with prostate cancer during his lifetime*

Black men are 1.7 times more likely to be diagnosed with prostate cancer than white men. It's important to note that Black men are at a higher risk of developing prostate cancer compared to men of other races. This makes it even more crucial for Black men to be aware of the risk factors, symptoms, and screening guidelines for prostate cancer. By discussing and raising awareness specifically within the Black community, we can help ensure that men are informed about the importance of early detection and seeking appropriate medical care.

In Jacksonville, Florida, an estimated 287,957 residents identify as Black or African American, making up approximately 30.71% of the total population (excluding multiracial individuals) based on the latest American Community Survey 5-Year data. The city has experienced a notable increase in African American population, with data from the 2020 census revealing a growth of 32,000 to 40,000 Black residents between 2010 and 2020. This demographic shift reflects a trend known as "reverse migration," some descendants of the Great Migration choose to return to Southern cities like Jacksonville for a lower cost of living, favorable weather, and overall quality of life.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

**Breaking Down Prostate Cancer: Facts, Awareness, and Prevention**

- 299,010 new cases of prostate cancer are expected to be diagnosed in 2024
- A man is diagnosed with prostate cancer every 2 minutes
- 1-in-8 men will be diagnosed with prostate cancer during their lifetime
- Prostate cancer is the second leading cause of cancer death in men
- 35,250 men are expected to die from prostate cancer in 2024
- A man dies from prostate cancer every 15 minutes
- Today, there are more than 3.3 million prostate cancer survivors
- The 5-year survival rate for prostate cancer diagnosed in its earliest stages is over 99%
- The 5-year survival rate for advanced or metastatic prostate cancer drops to 34%

**Knowledge is Power: Understanding Prostate Cancer in the Black/African American Community**

- Black men are 1.7 times more likely to be diagnosed with prostate cancer than white men
- Black men are 2.1 times more likely to die from prostate cancer than white men
- 1-in-5 Black men will be diagnosed with prostate cancer during his lifetime

**Honoring Those Who Served: Prostate Cancer Awareness for Veterans**

- 1-in-5 Veterans will be diagnosed with prostate cancer in their lifetime
- Prostate cancer is the most common cancer diagnosis among U.S. Veterans
- Prostate cancer incidence rates in the military are nearly twice those of the general population

**Empowering the Hispanic/Latino Community: Essential Prostate Cancer Facts You Need to Know**

- 1-in-9 Hispanic men will be diagnosed with prostate cancer during his lifetime
- Prostate cancer is the most commonly diagnosed Cancer among Hispanic/Latino men in the U.S.
- Hispanic men are less likely to be diagnosed with and die from prostate cancer than non-Hispanic white men and non-Hispanic Black men.
- However, prostate cancer mortality rates among men in Puerto Rico are 40% higher than those in non-Hispanic white men.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## Jacksonville: Leading the Charge Against Cancer

### Together We Can Defeat Cancer!

#### *Operating Proton Therapy Centers*

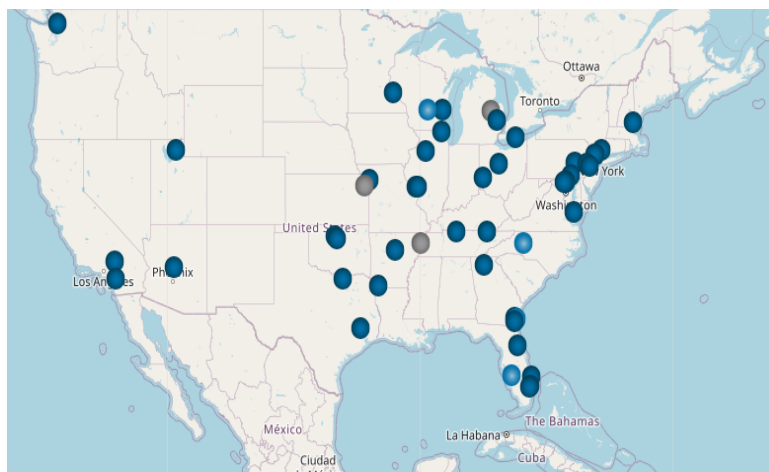

Jacksonville is set to become the world's only city with three proton centers, featuring the **University of Florida Proton**, **Ackerman Proton**, and the upcoming **Mayo Clinic Proton Center**. This unique distinction positions Jacksonville at the forefront of the global battle against prostate cancer, solidifying its leadership in cutting-edge cancer treatment.

1. University of Florida Health Proton Therapy Institute, Jacksonville, FL (2006)
2. Ackerman Cancer Center, Jacksonville, FL (2015)
3. Mayo Clinic, Jacksonville, FL, completion in early 2025

#### *Prostate cancer cases are projected to double by the year 2040*

Having such advanced facilities in one city puts Jacksonville on a unique step forward in the global fight against Cancer. These state-of-the-art facilities in Jacksonville mean that patients in the area and beyond have access to some of the most advanced and effective treatment options available. It also attracts top medical professionals and researchers to the city, fostering collaboration and innovation in the field of oncology. By taking the lead in the fight against prostate cancer, Jacksonville is setting a powerful example for other cities and communities to follow in the quest to defeat this devastating disease.

***Since 2012, the quantity of proton therapy centers in the United States has increased by over 100%, and the number of patients undergoing proton therapy.***

54. The University of Texas Health Science Center at San Antonio, TX

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing support, education, and knowledge.

## ACCCOLPH Solutions

**Support ~ Education ~ Knowledge**– encapsulates a powerful approach to personal and communal growth:

- **Support** is the foundation. It implies offering oneself or others emotional, social, or practical help. It's about creating a nurturing environment where individuals feel valued and empowered.
- **Education** is the structure built on that foundation. It involves the acquisition of knowledge, skills, values, and attitudes. It's both formal and informal and is essential for personal development and societal progress.
- **Knowledge** is the outcome and ongoing process. It is the understanding or skills gained through Education or experience. Knowledge is dynamic, continuously expanding through life's experiences and further learning.

These elements collectively create a growth cycle where support fosters an educational environment, cultivates knowledge, and knowledge enhances the ability to self-support and practically assist others.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

**Our community thrives on open communication and dialogue.**

**Our community needs more Talk, Talk, Talk, Talk.**

**Talk** about Prostate Cancer

**Talk** about Early Detection

**Talk** about testing PSA Prostate Specific Antigen

**Talk** about Prostate Cancer in Families

**Talking about Prostate Cancer**

It is important to openly discuss this disease as it highlights the significance of early detection through regular screenings and testing, such as the PSA (Prostate Specific Antigen) test. Educating individuals about the importance of early detection can lead to timely intervention and improved treatment outcomes.

**Talk about Early Detection**

By highlighting the benefits of early detection in the fight against prostate cancer, we can encourage individuals to prioritize their health and seek regular screenings. Early detection can increase treatment options, improve prognosis, and save lives.

**Talk about testing PSA (Prostate Specific Antigen)**

Understanding the role of PSA testing in detecting prostate cancer early is crucial. By discussing the importance of this screening tool and its impact on diagnosis and treatment, we can empower individuals to make informed decisions about their health and well-being.

**Talk about Prostate Cancer in Families.**

Addressing the genetic component of prostate cancer and the increased risk for individuals with a family history of the disease is vital. Discussing family history's implications can encourage genetic counseling, support affected families, and promote proactive health measures to reduce risk.

Let's keep the conversation going! By talking about prostate cancer, early detection, PSA testing, and the role of family history, we can raise awareness, promote better health outcomes, and make a positive impact in the fight against this disease.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## Reducing the Stigma

Research from 2020 shows that many people with prostate cancer experience stigma and shame. Some view the disease as "an emasculating journey," while others are reluctant to speak about their concerns or a diagnosis in their homes and communities. This may be due to cultural or religious expectations around keeping such matters private.

Talking about prostate cancer helps increase awareness by educating people about the risk factors, symptoms, and importance of early detection. By raising awareness, more men may be encouraged to get regular screenings and seek medical advice if they notice any potential signs of prostate cancer. Increased awareness can also lead to more research funding, better treatment options, and improved support for those affected by the disease. It's essential to have open conversations about prostate cancer to promote early detection and better outcomes.

Our community must engage in open and ongoing conversations about prostate cancer to raise awareness, promote early detection, and provide support to those affected. By encouraging more talk about prostate cancer, we can help dispel myths, reduce fear, and empower individuals to take proactive steps toward their health.

Talking about prostate cancer allows us to emphasize the importance of early detection through regular screenings and testing, such as the PSA (Prostate Specific Antigen) test. Educating individuals about the significance of early detection can lead to timely intervention and improved treatment outcomes.

Furthermore, discussing the impact of prostate cancer on families is crucial. By talking about the genetic component of prostate cancer and the increased risk for individuals with a family history of the disease, we can encourage proactive health measures, genetic counseling, and support for affected families.

Raising awareness and promoting discussions about prostate cancer are crucial steps in the fight against this disease. By increasing public knowledge about prostate cancer, its risk factors, symptoms, and available treatment options, we can empower individuals to take charge of their health and seek timely medical attention. Encouraging open conversations about prostate cancer can also help reduce stigma, promote early detection through screenings, and provide support for those affected by the disease. Together, through Education, advocacy, and dialogue, we can work towards better outcomes for individuals impacted by prostate cancer and ultimately strive to defeat it. Let's continue to spread the word and encourage more talk about prostate cancer to make a positive impact on the lives of many.

So, let's keep the conversation going! Talk about prostate cancer, early detection, PSA testing, and the role of family history in raising awareness and promoting better health outcomes within our community. Together, we can make a difference in the fight against prostate cancer.

## ROI with Acccolph

## ACCCOLPH Competitive Advantages

Its several competitive advantages set it apart in prostate cancer awareness and advocacy. Here are some key factors that contribute to its competitive edge:

**Community Integration:** ACCCOLPH's deep integration within the community gives it a unique understanding of local needs, challenges, and opportunities related to prostate cancer awareness. This enables tailored and impactful initiatives that resonate with community members personally.

**Multi-Stakeholder Collaboration:** By fostering collaborations with healthcare providers, research institutions, government agencies, and community organizations, ACCCOLPH leverages a diverse network of expertise and resources to drive comprehensive and effective awareness campaigns.

**Innovative Approach:** ACCCOLPH adopts innovative strategies and technologies to engage with the community, deliver educational content, and promote early detection of prostate cancer. This forward-thinking approach keeps the organization at the forefront of advocacy efforts.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

**Data-Driven Decision-Making:** ACCCOLPH utilizes data analytics and feedback mechanisms to measure the impact of its initiatives, track key performance indicators, and continuously improve its programs based on evidence and insights.

**Credibility and Trust:** Through consistent, transparent, and impactful communication, ACCCOLPH has built a reputation for credibility and trust within the community. This trust enhances the organization's ability to influence behavior change and drive positive health outcomes.

**Sustainability and Long-Term Vision:** ACCCOLPH is committed to sustainable impact and long-term health outcomes. Its strategic planning, stakeholder engagement, and advocacy efforts are geared toward creating lasting change in the fight against prostate cancer.

By leveraging these competitive advantages, ACCCOLPH stands out as a leader in prostate cancer awareness, advocacy, and support, making a significant difference in the lives of individuals and the community.

### **ACCCOLPH Leveraging**

Being actively engaged in the community provides a unique leverage point for ACCCOLPH in its efforts to raise awareness about prostate cancer. Here's what makes this leverage different:

**Local Impact:** By being embedded in the community, ACCCOLPH can tailor its awareness campaigns to address specific needs, cultural sensitivities, and healthcare disparities prevalent in the local population. This targeted approach can resonate more effectively with community members and drive meaningful engagement.

**Trust and Credibility:** Building relationships with community members, healthcare providers, and local organizations over time fosters trust and credibility. This trust can enhance the effectiveness of awareness initiatives, encourage participation in screenings, and promote adherence to recommended healthcare practices.

**Accessibility and Reach:** Being present in the community allows ACCCOLPH to reach individuals who may not have easy access to healthcare information or resources. By leveraging community partnerships, events, and outreach programs, they can extend their reach to underserved populations and ensure that vital information about prostate cancer is accessible to all.

**Two-Way Communication:** Engaging with the community in a dialogue rather than a monologue enables ACCCOLPH to listen to community members' needs, concerns, and feedback. This two-way communication fosters inclusivity, empowers individuals to take charge of their health, and allows for co-creating relevant and impactful solutions.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

***Sustainable Relationships:*** By investing in long-term relationships with community stakeholders, ACCCOLPH can establish a sustainable framework for ongoing collaboration, advocacy, and support. This continuity ensures that the impact of their awareness efforts extends beyond individual campaigns and contributes to lasting change in the community.

In summary, the unique leverage of being in the community allows ACCCOLPH to create targeted, trusted, accessible, and sustainable initiatives that make a meaningful difference in raising awareness about prostate cancer and promoting better health outcomes for all community members.

## **What is ACCCOLPH**

ACCCOLPH Incorporated is a 501 non-profit organization dedicated to prostate cancer awareness and advocacy. It provides support, Education, and knowledge to men about prostate cancer.

The name of ACCCOLPH Incorporated is a tribute to the founder Arthur Bendolph Jr.'s family members, with each initial representing their names and unwavering support and solidarity during his battle with prostate cancer. Every family member has played a vital role in supporting Arthur and confronting the obstacles presented by the disease.

ACCCOLPH Incorporated is named after the founder Arthur Bendolph Jr.'s family members, each initially representing their names. The company name is a tribute to the unwavering support and solidarity Arthur received during his battle with prostate cancer. Every family member has played a vital role in supporting Arthur and confronting the obstacles. It was a transformative moment in 2021 when its founder received a prostate cancer diagnosis. This poignant experience fueled a shift in our mission towards advocacy, awareness, and combating the disease under the rallying cry of "Defeat Cancer ."

We have broadened our initiatives to offer educational resources and support groups customized for individuals fighting prostate cancer. Our primary focus is raising awareness and promoting early detection to impact the fight against this disease significantly.

Our commitment is to provide unwavering support to all men, with a particular focus on the most affected groups of veterans and African Americans who face a heightened risk of prostate cancer. We offer vital resources and knowledge to combat and eliminate the stigma surrounding this disease in our community.

ACCCOLPH, Inc. is a testament to our unwavering commitment to community service. With your support, we are confident we can make a significant difference in the battle against prostate cancer.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.

## Why Acccolph

### We are Prostate Cancer survivors

Defeat Prostate Cancer by increasing awareness. We are determined to make a difference in the fight against Cancer by spreading knowledge, promoting early detection, eliminating the stigma, and empowering individuals to take control of their health.

Through our specific initiatives, such as Defeat Cancer Forums educational programs like the Survivorship program and community outreach efforts like the ACCCOLPH community program, we aim to raise awareness about the importance of cancer prevention, early diagnosis, and access to quality care. By equipping individuals with the tools and information they need, we strive to empower them to make informed decisions and take proactive steps toward a healthier future.

ACCCOLPH Incorporated is a 501(c)(3) non-profit organization dedicated to prostate cancer awareness and advocacy by providing Support, education, and knowledge.
